INCIDENT MANAGEMENT SITUATION REPORT MONDAY, OCTOBER 16, 2000 - 0530 MDT NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION:

Initial attack activity was light throughout the nation. No new large fires were reported to the National Interagency Coordination Center. Very high to extreme fire indices were reported in California.

SOUTHERN AREA LARGE FIRES:

BOAR CREEK, Oklahoma Division of Forestry. This fire is located three miles southeast of Hominy, OK. No new information was reported. This will be the last report unless new information is received.

INCIDENT NAME	ST UNIT 	SIZE % CTN		TOTAL CE	!!				\$\$\$ C-T-D
BOAR CREEK	OK OKS	3500 50	NR	84 1	NR 41	2	0	NR	NR

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED FOR MISSISSIPPI, CENTRAL FLORIDA AND THE FLORIDA PANHANDLE FOR LOW RELATIVE HUMIDITY. ***

In Southern California, a ridge aloft will bring sunny and dry weather to the region. High temperatures will range from the 60's in the mountains, to the lower 90's in the warmest deserts. Minimum afternoon relative humidity will be 10 to 20 percent in the deserts and 20 to 40 percent elsewhere. Winds will be variable at 5 to 15 mph, and 10 to 15 mph along the coast.

In the Southeast, high pressure aloft and at the surface will keep Florida dry. Further north an approaching trough will increase moisture to that area. Maximum temperatures will be in the 70's in the north, and in the 80's in the south. Minimum relative humidity will be 30 to 45 percent in the north, and 30 to 40 percent in the southern inland areas. The southern coastal areas will have minimum relative humidity in the 40 to 50 percent range. Winds will be northeast at 5 to 15 mph in Florida, and variable at under 10 mph elsewhere.

In Oklahoma, an upper trough will bring additional showers and thunderstorms. High temperatures will range from the mid 60's to 70's. Minimum relative humidity will stay above 60 percent and winds will be north to east at 5 to 15 mph.
